Philadelphia, Oct. 13.—The Red Sox defeated the Philadelphia Nationals by a score of five to four here today.

The game was up and tuck until the finish.

Twice the Philadelphians took the lead, only to be tied and Harry Hooper finally clinched it for the American league champions by smashing a home run into the right center stands.

It was Hooper's big black bludgeon that put the Red Sox across the winning team.

The California boy smashed out two home runs during the game. Duffy Lewis was another hero for Boston. His home run, about in the eighth inning, sending in a run ahead of him and tying the score when he looked like a Philadelphia victory.

Philadelphia, Oct. 13.—Ideal weather prevailed for the fifth game of the world's base ball series.

Mayer was slated for the Phillies' mound, although the crowd was hoping for another "go" for Alexander.

The betting was three to one that Boston would take the series, and even that the Red Sox would win. The line-up was unchanged. The crowd dwindled from Tuesday's monster showings.

The Phillies were first on the playing field and were given a rousing cheer. Their fielding was lightning fast, far faster than the one in Boston.

The Boston players also got a friendly greeting. The practice of both teams was snappy. The sun is very warm.

Alexander and Mayer warmed up for Philadelphia. Foster warmed up for Boston.

The Batteries are:  
Philadelphia: Mayer and Burns.  
Boston: Foster and Thomas.

TAX DECISION  
WILL MEAN 1-2  
MILLION TO STATESTATE SUPREME COURT  
RULES 2 PER CENT GROSS  
TAX ON OIL LEGAL

Oklahoma City, Oct. 13.—In an opinion written by Justice Sharp, the state supreme court has upheld the validity of the 2 per cent gross production tax on oil, which was passed by the last legislature and attacked by the oil-producing companies immediately after its passage on the ground that the new law was unconstitutional.

All justices of the court concurred. The decision means that \$357,000 collected by E. B. Howard, state auditor, since the law became operative, March 11 until October 1, will go into the state treasury and help relieve the stringency that has caused the state warrants to be held up because of shortage in the general revenue fund.

Nearly all the oil producers in the state were interested in the suit to

ENDOWMENT FUNDS FOR  
UNI. MAY COME NOW

"The decision of the state supreme court affirming the city's grant of Convention hall to the Methodist university ends some litigation which was foolishly inaugurated in the first place," said a merchant today. "Now that O. M. U. has full and absolute title to the property we may expect some activity beneficial to Guthrie. With a permanently established home the university trustees are now in position to ask for the endowment preferred two years ago. With this endowment the hall can be reconstructed and made modern and new buildings added. I believe Guthrie did the right thing in deeding the hall property to the university."

COMMISSIONERS PREPAR-  
ING FOR GOOD ROAD WORKCHAMBER OF COMMERCE CO-  
OPERATING WITH COUNTY'S  
FISCAL AGENTS

The good roads committee of the chamber of commerce is actively co-operating with the county commissioners in getting work started on the various state highways over the county. The farmers and other property owners along a number of lines are putting in a great deal of volunteer work in grading the road in shape and the commissioners will put in the culverts and bridges and do the necessary blading. There is not near enough money put all of the lines in proper condition this year and the board of commissioners feel that it is no more than right that they spend the first money on the lines where the residents show enough interest and public spiritedness to get out and do the grading. As fast as any line is graded up in druggable shape contracts will be let to drag it and the Commissioners cannot let a dragging contract for any road until it is graded up in proper condition for dragging.

OIL MAN, FROM KAY,  
AFTER LEASES HERE

Ellis Sigamon, oil operator in the Kay county field, is here today. "I am much interested in the test wells now going down in this county. I am quite certain that oil underlies all of this part of the state and the trend from both the Kay and Drumright field in this way. I have made arrangements to secure some leases in the eastern part of Logan county near Meridian. That part of the county particularly appeals to me as a likely field for oil."

WILSON-GALT NUPTIALS

Dale &amp; Blerer, attorneys for the Methodist University, received Wednesday a copy of the final decision of the Supreme Court written by Justice Summers Hardy, handed down Tuesday evening in the case of the Oklahoma Methodist University, involving the title to the tract of ground and building in this city, now used and occupied by the Methodist University.

This property has been in litigation for more than two years, the contention being that the city had no right to transfer the ground to the university because, it was claimed, it was reserved for park purposes. There was and has been no question of the right of the city to transfer the building or its other splendid and expensive improvements on this ground. Speaking of the decision, Judge Blerer said: "In this decision of the court the matter is finally settled and the courts hold, following the leading case of Knight v. U. S. Land Assn., 142 U. S. 161, that when the government, through its proper officers within the scope of their authority, makes a grant by patent of public land as this formerly was, that that grant is conclusive upon the courts except in a direct proceeding to set it aside, and following the case of Wright v. Morgan, 191 U. S. 55, which is a direct precedent for this case, and which is known as the 'Denver case,' where government land was first granted to the city of Denver for a cemetery and the trust was changed under Act of Congress and the land then granted to the Catholic bishop of the diocese of Denver for church purposes. The opinion of Justice Hardy is a very able one and sets out and reviews at length all of the authorities bearing on this case and sustains both propositions contended for by the attorneys for the university, and conclusively settles the questions involved in its favor."

The city of Guthrie, as well as the university, owes a debt of gratitude to the court for its careful and most able consideration of this question. It is one of the most vital ones at the present time to the city of Guthrie. The Methodist University has made an enviable record even under
